## *We are audio visual interpretation specialists...*

We design, manufacture and install audio visual systems to help you ***explain*** and ***communicate information*** to your visitors.

### Audio

We manufacture a range of innovative internal and external audio interpretation products. Our best sellers include the SB Lite, U-Turn Round and Audio Frame 15.

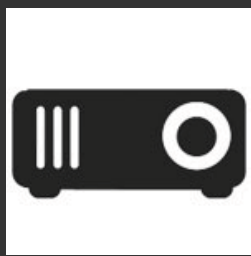

### Video

Want reliable solid state video playback equipment? We can specify and install it for you as well as create or edit content to play.

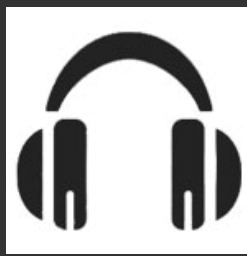

### Bespoke

With an inhouse design team we can design and manufacture bespoke audio visual kit to do what you want.

### Shelf AV

We are able to recomend and source proffesional off the shelf audio visual equipment such as lcd/plasma screens, touchscreens, projectors to suit your needs. We can also install this for you.

### Accessories

All the accessories you need for your audio visual equipment...amplifiers, speakers, handsets, headphones, buttons, PIR sensors etc.

### Software

If you require bespoke software and content to run on your hardware we can develop it just for you. Or why not take a look at our Lightbox software?

#### **Need media content?**

Dont worry we can do this too so your new blackbox-av product is ready to plug and play on delivery.

# MEDIA

Need media for your audio visual equipment?

Our in-house recording and editing facility means you can receive your new blackbox-av product with content loaded, ready to plug and play.

# INTERNAL AUDIO PRODUCTS

## MESSAGE IN A SPEAKER

A movement activated speaker! This medium sized quality speaker has been fitted with a PIR sensor, SD card player and amplifier - all contained within the speaker case...simply add power to deliver your message.

£395

<http://www.blackboxav.co.uk/message-in-a-speaker/>

£475

## AUDIO FRAME 15

A compact and durable listening point system. It has 15 re-programmable buttons which activate audio content. As few as 3 or as many as 150 audio tracks can be configured. You are able to customise your artwork to match your audio.

<http://www.blackboxav.co.uk/audio-frame-15/>

## SB LITE

A solid state digital audio playback device with built in amplifier. Activation options include up to 8 buttons or PIR sensors. Audio content is stored on an SD card. Output your messages to up to 2 handsets, 2 headphones or 2 speakers.

£199

<http://www.blackboxav.co.uk/sb-lite/>

£82 - £157

## HANDSETS & HEADPHONES

We offer a full range of robust, vandal resistant headphones and audio handsets. These output devices are ideal to reduce noise pollution around the listening device and are easy to use.

## TOUR MATE

The Tour-Mate is a compact, robust and lightweight audio tour guide that provides personal, interactive audio interpretation for museums, heritage sites and visitor attractions.

£315

<http://www.blackboxav.co.uk/tourmate/>

£695

## SD LISTENING POST

A compact solid state listening post capable of storing 999 audio tracks. Simply type in the 3 digit number into the keypad and the audio can be played. You are able to customise your artwork to match your audio.

<http://www.blackboxav.co.uk/sd-listening-post/>

## AUDIO DONATION BOX

Audio Donation Box is a donation box with an inbuilt solid state audio playback unit built in. When a visitor puts a coin or note donation into the slot it plays an audio file.

# EXTERNAL AUDIO PRODUCTS

## U-TURN ROUND

The U-Turn Round is our unique wind up, robust, weather resistant digital sound store designed for external use. It's reprogrammable and holds up to 8 selectable messages.

£995

<http://www.blackboxav.co.uk/u-turn-round/>

£795

## U-TURN PANEL

End of line...U-Turn Panel. Get yourself a great deal on our second generation self powered panel mounted 8 message sound store. Once they're gone they're gone!

SALE

<http://www.blackboxav.co.uk/u-turn/>

## SOLAR SOUND ROUND

Sister of the U-Turn, the Solar Sound Round has 8 selectable audio messages that will playback by simply pressing a button. Power is generated via a solar panel. New content can be changed as required.

£995

<http://www.blackboxav.co.uk/solar-sound-round/>

£545

## PIR SOLAR POST

A self powered external automatic talking post! Powered by a solar panel, a PIR sensor detects human movement then plays back a message. Playback can be programmed to loop a single message or play up to 8 tracks randomly.

<http://www.blackboxav.co.uk/pir-solar-post/>

£495

## BUTTON SOLAR POST

Similar to the PIR model, the Button Solar Post is powered by the sun. It stores two messages which are activated by the two corresponding buttons. Messages and volume are changeable via a simple to use programmer or dongle.
