OPERATION

AUDIO FILES

The MIAS POS audio files should be in MP3 format.

WORKING WITH AN SD CARD

Audio files can be stored in the root of an SD card, inserted to the card reader.

USING USB/UPLOAD TO INTERNAL MEMORY

Its possible to upload from a USB to the internal memory of the unit. Max USB size is 8GB. Files must be in the root of the drive. Insert the USB to the USB slot then press and hold button C for 3 seconds. The LED will begin to flash to show its transferring data from the USB to onboard memory. On completion the LED will go out. Remove the USB and reset the player by turning off the plug and then turning back on after 5 seconds.

NEXT / PREVIOUS TRACK

If there are multiple files on the player you can select the next / previous track by using button A / B.

VOLUME

To set the volume of the player V+ to increase V- to decrease.

LOOPING PLAYBACK

Press and hold button A for 3 seconds. The LED will flash to confirm selection. This playback option will play the same audio file each time the PIR is triggered.

SEQUENTIAL PLAYBACK

Press and hold button B for 3 seconds. The LED will flash to confirm selection. This playback option will play track 1 at first PIR trigger, then track 2 at the second trigger, then the 3rd track at third trigger etc.
