SA2 - SOUND AMPLIFIER 2

What is it?

SA2 is a compact 3 Watt per channel stereo 2 zone amplifier with a single feed aux input.

How does it work?

Audio In
The Sound Amp 2 allows for a single line in audio feed via a 3.5mm audio jack plug socket. If you need an audio or video device to use we recommend using a model from the Sound Clip or Video Clip player range.

Playback
The Sound Amp 2 will supply the same audio feed to each of the stereo channel speaker connections via terminal screw connectors (speakers 1 / speakers 2). Each of the stereo speaker outputs has its own independent volume control.
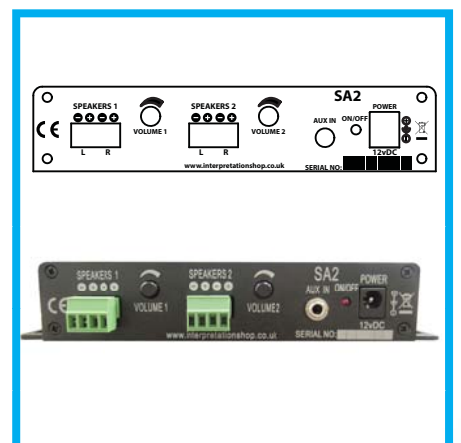

The Output
The SC2's dual output allows for up to four 4 or 8 ohm speakers.

Speaker terminals

How is it fitted?

The SA2 has fixing wings allowing for easy installation via screws or bolts.

SC2 Control Plate

SC2 SPECIFICATIONS

Input Connection	3.5mm audio jack
