SC8 - SOUND CLIP 8 AUDIO PLAYER

What is it?

SC8 is a solid state digital stereo audio player with built in amplifier. It can be activated via a PIR (movement sensor) or button switches.

How does it work?

■ Content
Audio files, stored in .mp3 format, are put onto a Micro SD card which is then inserted into SC8 audio player.

■ Playback
The Player can be programmed a number of ways:
- ■ Loop all audio files
- ■ Loop 1 file
- ■ 8 audio tracks activated by 8 buttons.
- ■ Track up / Track down controlled by 2 buttons. 99 track max. These controls can be programmed to be interruptible or non interruptible. Master volume control can be set on the player, but you can also connect 2 buttons for visitors to control the volume +/- up to the preset maximum.
- ■ PIR (movement) activation + reactivation delay.

■ Activation Options
There are a range of activation options to trigger messages from:
- ■ A PIR sensor which detects movement, or
- ■ 1 - 8 closed contact switches, typically push buttons.

■ The Output Options
- ■ Up to 2 Audio Plastic Handset
- ■ Up to 2 Audio Headphones or single cup headphone
- ■ The SC8 features a built in 3w internal amplifier per channel which allows for one 4 Ohm or two 8 Ohm speakers.

How is it fitted?

The SC8 has fixing wings allowing for easy installation via screws or bolts.
