

VIDEO FRAME 15

What is it?

Video Frame 15 is our easy-to-use media play back system. Capable of holding up to 15 videos, photos and audio tracks.

Video Frame 15 is blackbox-av's innovative way of allowing users to engage with content, giving them the opportunity to select from a considerable array of media through the simple press of a button. The front "menu card" is interchangeable, allowing you to change the design to suit your content. The Frame also allows for a standby video loop, preventing repetitive playback of content and a chance to showcase what the device has to offer.

How does it work?

Visitors are able to select media from the changeable menu card by the simple pressing a button.

The standby screen can be basic text instruction or video loop.

How is it fitted?

Video Frame is available in two forms.

1. A plastic cased unit which can be wall mounted or fitted into a exhibit or panel etc.
2. We can also supply a 19" kiosk which has a screen, player and speaker built in. This can be fitted onto a wall or floor stand.
