Safety Guide

Please observe the following when installing this device

Warning

- If there is damage to the power cable in any way, arrange for a replacement unit by contacting blackbox-av. They may require you to send the defective power unit back so in this case do not dispose of the power supply unless prompted to do so. If you wish to source your own power supply a CE or FC certified double insulated and regulated supply is required. The unit is supplied with a 1.5M IEC cable, if you wish to replace it, use one with a 5 amp fuse. Using a power cable with a higher voltage will irreparably damage the unit.
- Do not place the unit in direct sunlight for prolonged periods as this may cause the product to overheat.
- This product is not designed to be resistant to moisture or excessive dirt/dust. When deciding on a suitable installation point ensure there is reasonable protection from environmental damage.
- When attaching headphones or speakers please use certified and good quality accessories. Failure to use care with these connections may result in damaging the device and subsequently affect the blackbox-av warranty.
- When cleaning the screen, please use a Microfibre cloth.

Your new 32" Kiosk

In the box

1. 32" All-in-One Touchscreen/PC
2. Access Keys
3. Magnetic Power Key
4. DC Power Cable
5. Fixing Wings
6. Fixing Screws & Plugs
7. Optional Wall Bracket

Touchscreen

The Touchscreen supports up to 10 touches and gesture controls. It is ideal for use in high traffic public access environments. Utilising Capacitive touch technology to ensure reliability throughout extended use.

Lightbox 3

The Multi Touch Kiosk is compatible with our interactive software package, Lightbox 3. Designed specifically for museum & heritage applications.

Setting Up

Overview

32" All-in-One PC

Powered by a powerful PC the highly responsive 32" screen is capable of running both Lightbox 3 or any windows compatible bespoke options.

Magnetic Power Switch

The supplied magnetic key can be used to start up and shutdown the All-in-One. Simply make contact with the blue circle at the top of the screen, hold for half a second then remove and wait for the touchscreen to boot up.

Lockable Compartment

To access the compartment, simply use the supplied key.

Power Input

Inside the Compartment, you will find the AC IN to power the screen.

USB & LAN

You also have access to 2 x USB 2.0 and a LAN connection for wired internet.

Audio Out & Mic Input

If you wish to use headphones, simply plug into the 3.5mm audio output. You can also input a microphone into the touchscreen. These can both be found in the lockable compartment.

Mounting Options

VESA Wall Bracket

If you choose to mount the Touchscreen with the included VESA Wall Bracket please follow the steps below. You will receive the bracket as three pieces.

1. Mounting to a Wall

First screw the wall mount part into your surface using the supplied wall screws.

3. Fitting to the Surface

Fix the screw to the wall bracket and secure into place using the diagram above.

2. Fitting to the Screen

Position the fixing rods above the fitting holes on the rear of your screen (demonstrated above). Then fix into place.

Fixing Wings

You can also install through a panel with the supplied 4 x Fixing Wings.

Technical Information

Unit Weight	20.2Kg
