# **Professional LED Video Monitor**

User's Manual

Manual Version MP2-D.0

# **Safety Instructions**

- Please keep the display away from any heat sources such as electric radiators or direct sunlight. Place the display in a stable and well-ventilated place.
- Please handle with care so as to not damage the LCD panel.
- The holes or openings on the display are designed for ventilation. Do not cover or block the ventilation holes or openings with any objects.
- Remove protective covering from the screen before you use the display.
- As the display surface is vulnerable to scratches, avoid touching the surface with sharp pen point.
- Shut off the power supply before cleaning. Use a soft lint-free cloth instead of a tissue to wipe the screen.
- You may use a glass cleaner to clean the product as required. However, never spray the cleaner directly onto the display surface.
- Do not attempt to repair this product yourself! Improperly disassembly of the product may invalidate the warranty and lead to possible danger!

If you have a problem that cannot be solved using the "Troubleshooting" guidelines, please contact your supplier.

# **Quick Start Guide (Internal Media Player)**

This section of the guide is to allow swift set up and use of the unit. Please refer to the main part of the User Guide for full information on use of the unit.

Please follow the steps detailed below:

- 1. Unpack unit and place in desired location.
- 2. Take the power lead from the accessories bag, connect power lead and plug into mains outlet. Turn the AC switch to the ON position. After powering up you will be greeted by the home screen then the screen will start to play the default demo content.
- Collect the files you wish to display and make sure they are supported by the unit (see Section 3.1)
- 4. On a PC copy the files you want to play onto an empty USB drive. These should be in the root directory (without putting them into a folder). Remove USB from PC.
- 5. Insert USB drive into the one of the USB ports located inside the locker of the unit (see **Error! Reference source not found.**).

The screen should indicate that it is copying the files onto the unit. Please note that all files currently stored in the unit will be deleted. Once completed, the screen will display a message to remove the USB drive.

6. Remove the USB drive and the unit will reboot and play the stored files in a loop.

**Figure 1 USB Port Location** 

# Quick Start Guide (connecting to PC)

This section of the guide is to allow rapid set up and use of the unit. Please refer to the main part of the User Guide for full information on use of the unit.

Please follow the steps detailed below:

- 7. Unpack unit and place in desired location along with PC.
- 8. Connect the screen to the PC via the HDMI Cable (as shown below).

Figure 2 Screen to PC Connections

- 9. Power ON the PC.
- 10. Take the power lead from the accessories bag, insert the lead into the screen and connect to mains outlet. Then turn ON by the "AC Switch" located next to the power input.
- 11. If the screen does not display the signal from the PC then connect press the "SOURCE" button on the remote control and navigate to "HDMI" and press "PLAY".

# **1. Introduction**

Congratulations on your purchase of our product. Please read carefully and follow all instructions in the manual before first use.

The product should not be exposed to liquids dripping or splashing and no objects filled with liquids, such as vases, should be placed on the product.

For user convenience, a number of operations can be performed through the remote control.

#### Attention:

- 1. Do not change any default setting when it is unnecessary.
- 2. Keep the product far away from water during installation and use.

### **1.1 Box Contents**

1xProfessional LED Video Monitor

1xPower Cable

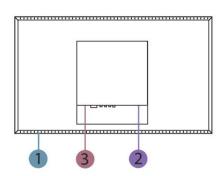

1xHDMI Cable

1xRemote Control (with AAA batteries)

1xCD (User Manual)

IMPORTANT: Please retain your screen's packaging for the duration of your warranty.

# **1.3 Serial Control Box (silver remote box)**

# **1.3.1** Connection to the screen

If your screen is installed in such a way that prevents access from the standard IR remote control sensor grill you can use the Serial Control Box which has an additional infrared sensor in it.

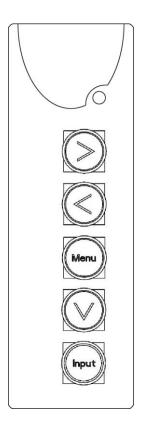

Figure 4 Serial Control Box to Screen Connection

Unless Remote Control is faulty it is recommended that you do not attempt to change any settings with the Serial Control Box, only use it as a sensor for the main Remote Control.

Once all required changes have been made the Serial Control Box can be disconnected if necessary.

# **1.6 Replacing the Remote Control Battery**

- 1. Slide the battery cover off, as shown below.
- 2. Remove the used batteries.
- 4. Insert the two new AAA batteries with their terminals corresponding to the indicators.
- 5. Put the cover back on.

# 2. Menus

# 2.1 Home Screen

Once your screen has powered up and begins to play content press the "STOP" button on the remote control to go back to the Home Screen (pictured below).

Figure 5 Home Screen

## 2.2 System Menu Operation

From the Home Screen you can bring up the Main Menu by pressing the "SETUP" button the remote control. The Main Menu includes following sub-menus: System Settings, System Control, Date & Time, Power On/Off, Timer Strategy, File Management and Exit.

Press  $\uparrow \& \downarrow$  to select the right item, press "PLAY" to confirm selection. To get back to the side menu press the "LEFT" navigation button on the remote control.

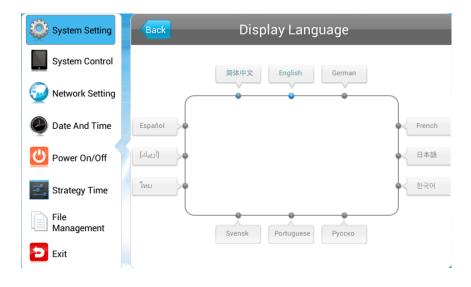

## 2.2.1 System Settings

The sub-menus within this section are: Display Language, Screen Mode, Screen Resolution, On Screen Clock, USB, Scrolling Text, Sync Settings, Restore to Factory Settings and Auto Start. To exit a sub-menu please press the "LEFT" navigation button the remote control, you can now navigate through the Main Menus sub-menus.

# 2.2.6 File Management

Here, you can check storage information such as memory capacity, used space and free space. You can also format the disk. You should be extremely careful here as **formatting the disk will result in a total loss of data.** 

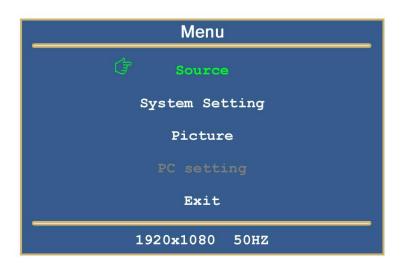

## 2.2.7 Exit

Highlighting and selecting this section will exit the Main Menu. If you have made any changes the system will ask to if you want to reboot the screen so that the changes can take effect, select "YES".

# 2.3 Display Settings

As well as having a main system menu that can be accessed through your home screen, the unit also has a display setting menu for changing which input source is being displays as well as altering values such as brightness, contrast and saturation. This can be accessed at any time by pressing the "MENU" button on your remote control.

#### Source

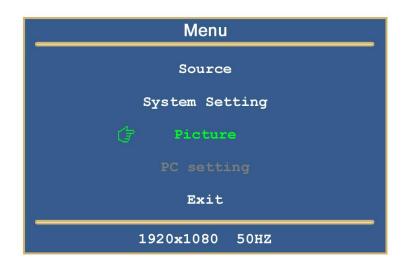

Here you can select which video signal the screen displays. As a default it is set to "Digital Signage" as this plays from the internal media player. You can also select HDMI and VGA, to do so navigate to your desired input source and press the "PLAY" button on your remote control. To go back to the previous menu navigate to Return and press "PLAY" on your remote control.

#### **System Setting**

PC setting				
🕝 Exit				
1920x1080 50HZ				

To exit from this Display Settings menu, navigate to Exit and press "PLAY". If inactive for more than 10 seconds, you will automatically exit this menu.

# 3. System Operation

# **3.1 Supported Media Files**

Media Type	Supported File Type
Image	JPG
Video	MPG, AVI, MP4
Audio	MP3

1. This unit does NOT support WMV or FLV video file types.

2. This unit does NOT support Sony ATRAC3, DTS or Dobly HD audio file types.

Note: Video and image files should be a maximum 1920x1080 resolution (16:9 aspect ratio).

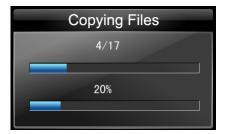

# 3.2 Steps to Load Media Files

1. Copy the files you want to play on to USB drive in the root directory (without putting them into a folder).

- 2. Insert USB drive into the USB port of screen.
- 3. This will automatically delete any files currently stored on the unit's internal memory.

4. The files will then be copied to the internal memory and once completely loaded it will ask you to remove USB drive.

5. Remove the USB drive.

Copy Complete					
Skipped:	0				
Overwrite:	1				
Copied:	16				
Please remove the USB disk					

6. The unit will now restart (if it doesn't please turn off and back on via the mains or press the reset button) and play the stored files in a loop.

# 3.3 Inputs

- IR Extension RJ45 Port for Silver Control Box
- LAN Local Area Network Input (for network upgrade)
- HDMI High Definition Multimedia Interface Signal Input (for HD Video & Audio signal)
- VGA Video Graphics Array Signal Input (for Video signal)
- 3.5mm Audio Input
- USB (x2) Universal Serial Bus (both for updating internal media player)

#### RS-232

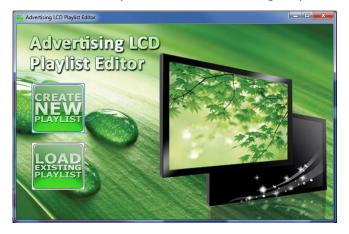

**Figure 6 Screen inputs** 

# 4. Advanced Guide

Although this unit can operate without using any additional software, for more advanced applications please copy the Playlist Editor scheduling software (on the CD provided) to your computers' hard drive. The software also allows you to edit existing

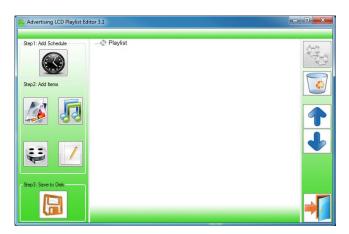

### 4.1 Main Menu

On opening the application you will be greeted by the main menu screen, giving you the options of "Create New Playlist" and "Load Existing Playlist".

# 4.2 Creating Playlists

Once you have selected "Create New Playlist" the playlist creator will be launched.

The Playlist Editor is laid out in a user friendly way with the primary functions on the left hand side in easy to follow steps.

# 4.2.1 Add Schedule

The schedule functions as a timer for the playlists, so you can have between one and eight playlists scheduled to start and end at different times of the day, with up to 50 files in each playlist.

Note: If you enter more than one schedule ensure that the consecutive schedule times do not overlap.

Click on the "Add Schedule" Button

- > Type a Schedule name
- > Select preferred start time
- > Select preferred end time
- > Click "OK"
- > Schedule will appear in the playlist.

To add more schedules simply follow the whole process again for the preferred number of schedules, ensuring you select unique schedule names and times.

# 4.2.2 Add Selected Items

Note: For compatible file formats please refer to 2.2 Supported Media Files.

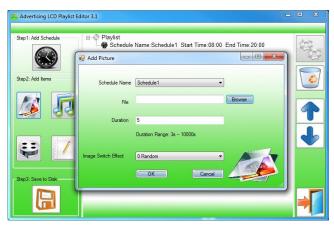

#### **Adding Images**

Note: Before adding image files please ensure that it has a file name of 11 characters or less and contain no special characters (!" $\pm$ %^&\* etc.) only .

Click the "Add Image" button > Select appropriate Schedule > Click "Browse" and locate and select files

- > Enter a duration time
- > Select Image switch mode
- > Click "OK"
- > Image appears in Schedule.

You can select multiple image files at once to add to a schedule, you can also move each item up or down in the playlist by using the arrow buttons on the right hand side.

#### Adding Audio

Note: Before adding audio files please ensure that it has a file name of 11 characters or less and contain no special characters (!"£\$%^&\* etc.).

Click the "Add MP3" button

- > Select Schedule
- > Click "Browse" and select MP3 file
- > Enter volume level
- > Click "OK"
- > MP3 Appears in Schedule.

Note: You must add audio files after all image files.

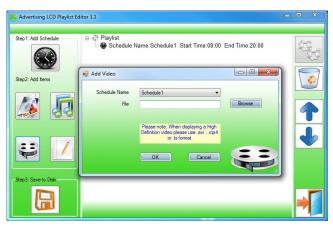

#### Adding Video

Note: Before adding video files please ensure that it has a file name of 11 characters or less and contain no special characters (!"£\$%^&\* etc.).

Click the "Add Video" button

- > Select Schedule
- > Click "Browse" and locate Video file
- > Enter preferred repeat
- > Enter preferred volume
- > Click "OK"
- > Video appears in playlist.

Note: You cannot add Videos and MP3 audio files in the same schedule.

#### **Adding Scrolling Text**

Note: you must ensure that the scrolling text function is activated on your display, you can do this by accessing the System Settings of the Main Menu (see 1.5.1 System Settings)

Click the "Add Scroll Message" button >Enter the message you would like to run across the bottom of the screen Or if you have a pre-existing .txt document containing your message: >Highlight the "Import from file" checkbox and click "Browse" >Locate .txt file and highlight >Click "OK" >Message appears at the bottom of the playlist.

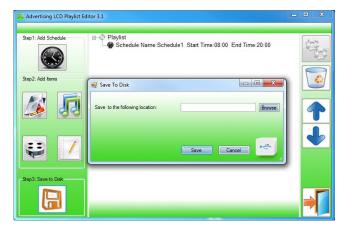

# 4.2.3 Saving

Note: Before saving please ensure location drive is empty.

Click "Save to Disk"

> Click "Browse" and select the top level of the USB drive as the location of the playlist and files > Click "Save".

# **4.3 Editing Playlists**

From the main menu click "Load Existing Playlist"

- > Locate and select playlist to edit
- > Playlist appears in playlist creator
- > Select item to edit and click "Edit" button located on the top right hand side of the application.

Note: You can also add items to the playlist and add further schedules.

# 4.3.1 Deleting Items

To delete items within a playlist, select the item and click "Delete" - located on the right hand side of the application. The item will be removed from the playlist.

# 5. F.A.Qs and Troubleshooting Guide

# 5.1 My Video Monitor is not displaying what is on my PC

## 5.1.1 Input Source

Your monitor may be sourcing its display from another input. First ensure that your screen is connected to your PC (or other video source) via one of the inputs. Next, press "SOURCE" and then navigate to the input source that corresponds with the one you are using and select by pressing "PLAY".

HDMI
VGA
Digital Signage

# 5.2 How do I play PowerPoint presentations on my display?

## 5.2.1 Option 1 (for plain slides with no animation):

You can save the PowerPoint presentation as a JPEG File Interchange Format (.JPG). Microsoft PowerPoint software allows the user to do this

1) Create or open a PowerPoint presentation.

2) Click File >Save As

3) Enter a File name

4) Click on "Save as type" scroll down and find the file extension "JPEG file interchange format", as shown in the image below.

Favorites				
My Network	File <u>n</u> ame:	Digital Sign	•	<u>S</u> ave
Places	Save as type:	Presentation	-	Cancel
		Design Template		
_		PowerPoint Show	_	
		PowerPoint Add-In		
		GIF Graphics Interchange Format		
		JPEG File Interchange Format		
		PNG Portable Network Graphics Format	<b>_</b>	

5) Click Save.

6) A message will appear asking if you would like to save all slides as JPEG's

7) Once you have selected your option, The JPEG images will be saved and are ready to use within a playlist or to upload to a storage device.

Note: For the best portrait resolution, you can use this PowerPoint Page Setup: Width 42.6cm; Height 24cm (16:9 Ratio)

# 5.2.2 Options 2 (for presentations with animation):

You can convert the PowerPoint presentation to a MPEG video clip. For the best display quality you should use the MPEG2 format which gives the best display quality. We suggest that you use the following software:

Software Name: Wondershare PPT2DVD

Web link: <u>http://www.ppt-to-dvd.com/ppt2dvd/overview.html</u> :

Select Video Format: PowerPoint to MPEG2 Video Settings:

- TV Standard: NTSC (29.97fbs);
- Standard: Standard DVD;
- Aspect Ratio: 16:9 (widescreen);
- Encode Size: Width 720, Height 480.

### 5.3 Video Format Conversion

There are two possible tools for converting video

## 5.3.1 Format Factory

This is a free multipurpose convertor that can be used for normal definition

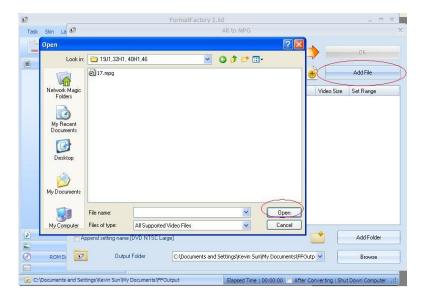

#### **Standard Definition**

1. Download a free convertor (Windows) called Format Factory which can be found at <a href="http://www.formatoz.com/">http://www.formatoz.com/</a>

2. Start the Software (picture 1).

2			FormatFactor	y 2.60		- = X
Task	Skin Language Help					
F	Lemove 🔀 Clear List		Stop 🕼 Start   👩 Optic	on 📷 Output Folder 📀	HomePage	
	Video		Camera	E o mm o	Mobile	
	All to RMVB		67 -0	Forma Facto	ry Device	
			Source Size	Convert State	Output [F2]	-
	All to GIF				1	
	$\odot$					
	All to WMV					
	All to MKV				1	
	<b>O</b>				1	
	All to MPG			30	1	
				HILIMIN O		
	All to VOB	-				
2	Audio					
<b>-</b>	Picture					
0	ROM Device\DVD\CD\ISC	)				
	Advanced					

- 3. On the left hand window pane select the 'Video' conversion options.
- 4. Select the 'All to AVI' conversion
- 5. Click the 'Add File' button and locate the file to be converted.

6. Click the 'Output Setting' button and modify it to look like the image shown below. A number of important settings have been highlighted.

7. Select 'OK' to save these changes and then Press 'OK' button to goto main screen

	Video Setting	3
Profile HD 1280x720 XVID Wide Screen	Save As OK

# 5.3.2 HD Video Converter Deluxe

This is only really useful for High Definition videos. Download link: <u>http://www.winxdvd.com/hd-video-converter-deluxe/</u>

This software is not free.

MP4 gives the best display quality. Please follow the following steps:

- 1. Select "to HD MP4" tab.
- 2. Change audio quality to 448 kbps, and change video quality to 12000, output image setting to custom size with custom aspect ratio, and video resolution to HD1080P(1920:1080), video codec to MPEG4.

See the screen shot below for the recommend settings.

## 5.4 Connecting screen to PC

If your PC has a HDMI output then this is ideal. Simply connect one end of a HDMI cable to the screens HDMI input (see Figure 4) and the other to your PCs HDMI output port. Using this method will carry both your PCs visual and audio signals. If your PC does not have a HDMI output, connect it to the screen using a VGA cable instead, this carries the video signal. If you wish the audio signal from your PC to be sent to the screen as well, this can be achieved by using a male-to-male 3.5mm audio jack cable. To change the input source of your screen press the SOURCE button located on the top right hand corner of your remote control. Next, navigate to your desired source and press "PLAY" on your remote control.

### 5.5 My media file does not fit properly on the screen

If your media is being displayed with black edges please refer to section 3.11. This has happened because the file does not have a 16:9 aspect ratio (1920x1080). Please resize file to 1920x1080 pixels and try loading the media onto the display once again.

### 5.6 My media file will not display or is missing from the playlist

In this situation the first step to take is to start with a blank USB drive. Copy one supported picture file (2.1 Supported Media Files) onto the blank USB drive and insert this into the unit. If this works there are most likely one or more unsupported files or folders on your original playlist.

If this does not work please check first that the media file is the correct size to fit the screen –1920x1080 pixels. If it is any bigger than this it is likely the media file will not display.

Finally make absolutely sure that your media is a supported file type as the screen will not recognise unsupported file types.

### 5.7 My media files will not update

If you are have problems updating your display follow these steps to ensure it is not a technical issue.

- 1) Ensure that there are no additional unsupported files or folders stored on the USB drive.
- 2) Make sure the USB drive is firmly inserted into USB slot
- 3) Before contacting your supplier try another USB drive to be certain this is not the fault.

# 5.8 My moving GIF files will not move.

As the screen recognises any .gif file as an image it will display the first frame of a moving gif for the allocated image display time.
